

Section 1: Functions Related Questions

1.

Create a function that takes two numbers as parameters and returns their addition.

2.

Write a function that takes a student name and marks as arguments and prints whether the student passed or failed.

Requirements:

- Pass marks = 50
- Use if-else condition

3.

Create a function that accepts a list of numbers and returns the largest number from the list.

Example:

[10, 45, 67, 23]

4.

Write a function that takes a string as input and counts the number of vowels in it.

Example:

"Python Programming"

5.

Create a shopping bill function that takes:

- Item name
- Item price
- Quantity

And returns the total bill.

Section 2: Lambda Function Questions

6.

Write a lambda function to calculate the square of a number.

7.

Create a lambda function that checks whether a number is:

- Even
- Odd

Using if-else inside lambda.

Banking System

Create a banking system using functions.

Features:

- Deposit money
- Withdraw money
- Check balance

Requirements:

- Use:
 - Variables
 - Loops
 - If-else
 - Lists
 - Dictionaries
 - Functions
- Prevent withdrawal if balance is low

Product Management System

Write a program that stores product details in a dictionary.

Requirements:

- Add product
- Remove product
- Display products
- Calculate total prices

Concepts to Use:

- Functions
- Loops
- Dictionaries
- Operators
- Conditions
